**AEMO – Second Stage Consultation – Metering Data Provision Procedures**

To: [MDPP@aemo.com.au](mailto:MDPP@aemo.com.au)

Attention: Ms. Taryn Maroney

Dear Ms. Moroney

**RE: Momentum Energy Submission in response to AEMO's draft Metering Data Provision Procedure (MDPP)**

Momentum Energy wish to submit to AEMO its response to the above mentioned draft and thank AEMO at this time for the opportunity to participate in the consultation process.

Momentum Energy are a growing retail business that is becoming increasingly active in the broader industry forums, working groups and supporting bodies. This is our first exposure to the creation of a new industry procedural document and it must be said that the resulting draft document has been disappointing.

Momentum Energy have observed several industry participants become significantly active and keenly interested in producing a quality document that accurately reflects and supports the AEMC Customer Access To Data Final Determination and resulting NER Customer Access To Data Rule Change (7.16). Unfortunately, the resulting draft falls short of these requirements and in many cases exceeds the boundaries of what is prescribed by the governing 7.16 rule of the NER and from what was prescribed by the AEMC.

Momentum Energy would encourage AEMO to seek further assistance and guidance from the AEMC so as to clearly determine the scope and nature of the MDPP within the confines of the NER7.16.

Please find our formal detailed response attached for your consideration.

Momentum Energy would like to thank AEMO for their efforts and engagement with industry participants both inside and outside of the scheduled workshop environments to address their respective and collective concerns.

Should you have any queries or would like to discuss our attached submission, please do not hesitate to contact Ms. Annmarie Lavin on (03) 8612 6418 or alternatively at [annmarie.lavin@momentum.com.au](mailto:annmarie.lavin@momentum.com.au).

Kind Regards  
Annmarie Lavin
