Subject: M2 Energy Submission on Metering Data Provision Procedures

Good Afternoon,

I apologise for the late submission on the Metering Data Provision Procedures. M2 have reviewed the 2nd Draft and generally and have the following comments.

Item	M2 Energy Comment.
2.3 (b) multiple file requests	<p>M2 considers that it is reasonable to differentiate the response timings for multiple file request, but we believe that the maximum file number be reduced to 30 requests per party. We consider that 100 items per day, per Authorised Rep will be an onerous requirement for small retailers to manage, even with the extended 20 day time frame. M2 believes the process of authenticating 100 requests alone is a potentially time intensive process.</p> <p>Reducing the number to 30, reduces the risk/impact of small retailers being swamped with several multiple file requests, that then cannot be easily managed.</p>
4.3 Demand Information displayed in the interval meter data summary	<p>M2 does not consider that the provision of demand information in the summary format will be practicable. At this stage billing based for small customer is still not a requirement, and there is still no consistent approach to how this will be calculated and applied by distributors. M2 considers that inclusion of this information in the summary reporting at this time is premature and complicates the delivery of the summary by 1/3/2016.</p> <p>M2 Believes that this requirement should be removed from this version of the MDPPs until demand based billing has been implemented.</p>

If you wish to discuss these comments in more detail, please do not hesitate to contact me

Regards

Andrew
