

# PARTICIPANT BUILD PACK 1- PROCESS FLOW DIAGRAMS VER 3.67 TABLE OF TRANSACTIONS VER 3.56

PREPARED BY: MARKET DEVELOPMENT  
DOCUMENT REF: 305196  
VERSION: [3.67](#)  
DATE: [29 September 2017](#) [29 November 2021](#)  
FINAL :

## Document Approval and Acceptance

### AEMO Approval

This document has been prepared by:

<b>NAME:</b>	<b>NANDU DATAR</b>		
<b>Position:</b>	<b>Business Analyst</b>		
<b>Signature:</b>			<b>Date:</b>

This document has been reviewed and conforms with the authorised changes to the Gas Interface Protocol:

<b>NAME:</b>	<b>RUTH GUEST</b>		
<b>Position:</b>	<b>Manager, Regulatory</b>		
<b>Signature:</b>			<b>Date:</b>

This document has been reviewed and conforms to AEMO's regulatory obligations:

<b>NAME:</b>	<b>PETER GEERS</b>		
<b>Position:</b>	<b>Executive General Manager, Markets</b>		
<b>Signature:</b>			<b>Date:</b>

## Version History

VERSION.	DATE	AUTHOR(S)	CHANGES AND COMMENTS
3.0	01/07/10	S. Monaco	<ul style="list-style-type: none"> <li>• Ensure document complies with AEMO standard.</li> <li>• Replace references to MSOR with relevant NGR &amp; RMP references.</li> <li>• Update terminology to correspond with current usage and definitions.</li> <li>• Update acronyms to the current vernacular.</li> <li>• Update images</li> <li>• Add References to Predecessors</li> <li>• Diagram 2.0 – Remove process flows 2.18, 2.19 and 2.21 which related to an aseXML transaction interface between RB and DB for confirming current FRO. This aseXML transaction does not exist.</li> <li>• Diagram 2.0 – Process flow 2.12 to 2.27 which relates to an aseXML transaction called Meterdatahistory, which is not operational in aseXML. It is however operational as an email.</li> <li>• Diagram 4.0 – Remove the information bubble that made reference to reviewing Meter Route schedule being considered as an aseXML. This transaction continues to be made available via email.</li> <li>• Diagram 5.4 – Remove the information bubble that made reference to reviewing Meter Time Expired notice being considered as an aseXML. This transaction continues to be made available via email.</li> <li>• Diagram 13.1, 13.2A, 13.3 and 13.7 – yellow change marks as agreed in IN003/09 (CR96 – Minor RoLR Documentation Changes) have been included. A copy of the IN003/09 GMI is available from <a href="mailto:grcf@aemo.com.au">grcf@aemo.com.au</a></li> </ul>

<a href="#">TBA</a>	<a href="#">TBA</a>	<a href="#">A. Pathy</a>	<ul style="list-style-type: none"><li><a href="#">IN011/20 Add CDN and CDR to gas market systems</a></li></ul>

## Executive Summary

The Table of Transactions version 3.5TBA contains: Table of Transactions, Table of Elements, List of Job Enquiry Codes, Address Elements and MIRN and Meter states.

Note: The Table of Transactions is a separate document and is not included in the electronic version of this document.

## References to Predecessors

To reflect the governance changes implemented on 1 July 2009, this document has been amended to remove references to the Victorian Energy Networks Corporation (VENCORP) and replace such references with Australian Energy Market Operator (AEMO). Where any content inadvertently refers to VENCORP it should be read as referring to AEMO.

It should be noted that participant ID "VENCORP" remains as the participant ID for AEMO as the gas market operator in Victoria and Queensland.

## 1 Process Flow Diagrams

1. These flow charts were developed as a working aid to development of the Retail Market Procedures (Victoria) and the Participant Build Packs for the purpose of identifying the necessary transactions between Retailers, Distributors and AEMO. Whilst reasonable effort has been made to ensure that these flow charts are updated and consistent with the Retail Market Procedures (Victoria) and the Participant Build Packs, there may be differences between the flow charts and the Retail Market Procedures (Victoria) and the Participant Build Packs. Where there is a difference, the Retail Market Procedures (Victoria) and the Participant Build Packs take precedence.
2. The process steps within individual business are indicative only and do not necessarily identify all required process steps nor do they mandate the use of a particular process.
3. The drawing conventions used for these diagrams are as follows:
  - a. Multiple flow arrows exiting from a process step indicate two or more independent process flows that occur following the step. If a flow is conditional, that condition will be noted on the flow arrow.
  - b. Alternative flows are indicated by a decision box containing a question. Conditions based on answers to the question on the flows exiting these boxes will be noted on the flow arrows.
  - c. A “fork” synch bar indicates two unconditional parallel processes that will rejoin at some point with a “join” synch bar. A join indicates that all processes must be completed before moving on.
4. Flow arrows that cross “swim lanes” to connect to a start or end identifier are used to ease diagram production and do not indicate a B2B transaction.

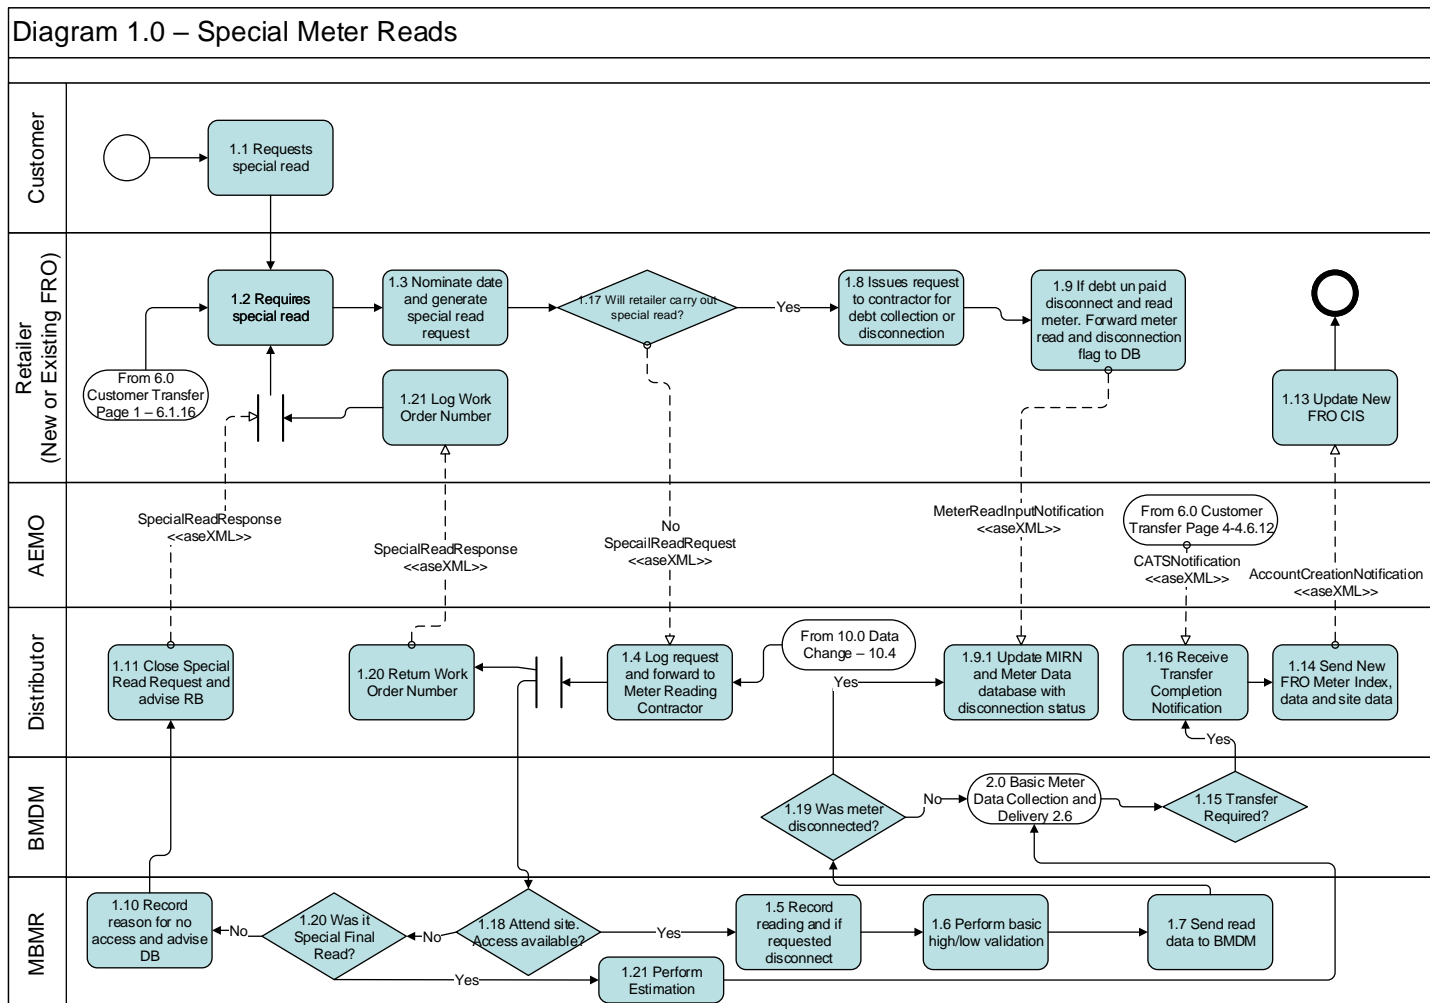

## 1.1 Process Flow Symbols

The drawing conventions used for these diagrams are as follows:

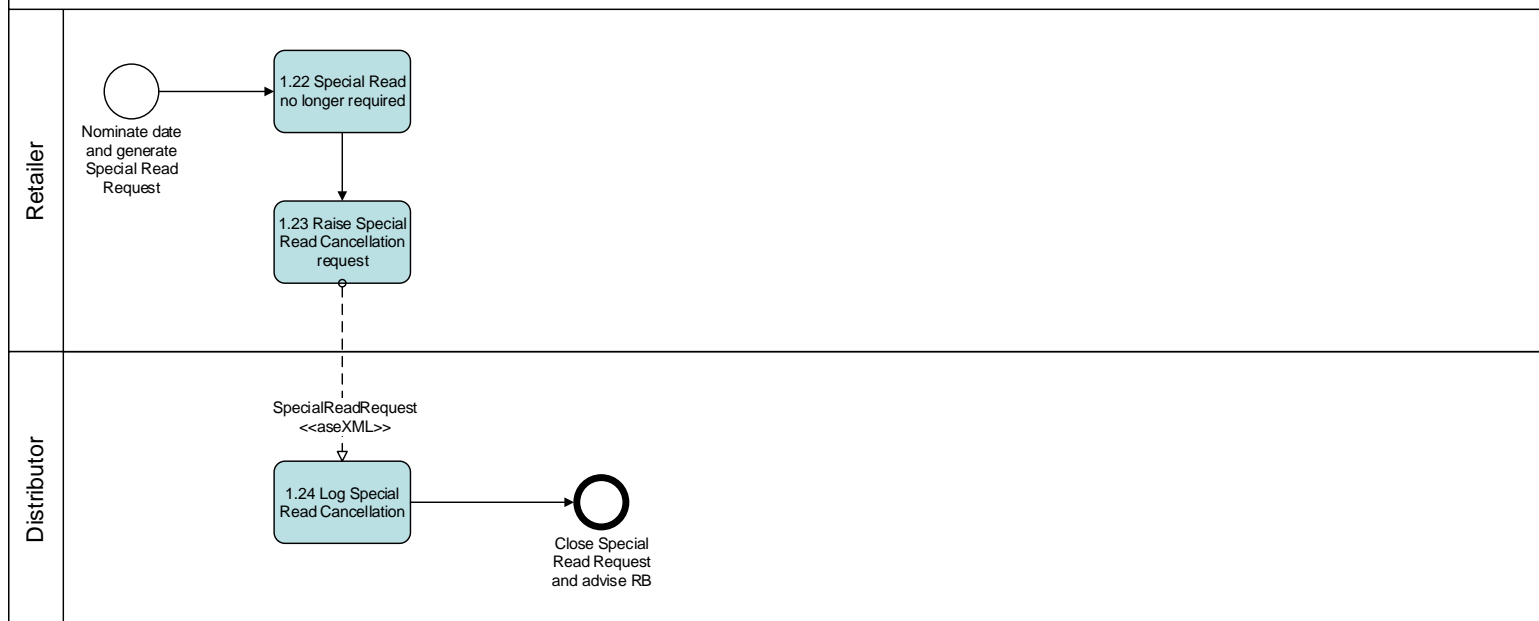

### Diagram 1.0 – Special Meter Reads

**1.3 DIAGRAM 1.1 – SPECIAL METER READS CANCELLATION**

Diagram 1.1 – Special Meter Reads Cancellation

## 1.4 DIAGRAM 2.0 – BM DATA COLLECTION AND DELIVERY (PAGE 1)

Diagram 2.0 – BM Data Collection and Delivery (Page 1)
