1 Introduction

1.1 Overview

These release notes outline the updates included in the Real-Time Market Submissions Version 2.5 release. This Real-Time Market Submission (RTMS) release introduces improvements to submission validation and system performance. The changes correct validation for newly registered Facilities and Non-Scheduled Facilities (NSF), and improve the performance of the RTMS to WEMDE publication process.

1.2 Terms and abbreviations

The terms and abbreviations used in this document are outlined in Table 1.

Table 1 Terms and abbreviations

Abbreviation	Expanded name
RTMS	Real Time Market Submissions
NSF	Non-Scheduled Facilities
WEMDE	WEM Dispatch Engine

2 Updates In This Release

This release includes the following improvements to RTMS:

- **Publication Performance:** Improved system performance to reduce query timeouts when sending data to WEMDE.
- **Facility Registration:** Updated validation to prevent submissions for Trading Days prior to a Facility's effective registration date.
- **Non-Scheduled Facilities:** Updated validation to ensure injection submissions use MIN and withdrawal submissions use MAX.

3 External Impacts

The below table outlines potential impacts of the above changes that Market Participants should be aware of.

Table 1 Items in Scope

Scope Item	Status	Summary
Publication Performance	🟢	Query optimisation.
Facility Registration Validation	🟡	Corrected the issue where participants could submit for trading days before their effective registration date.
Non-Scheduled Facility MIN/MAX Validation	🟡	Corrected the issue where Non-Scheduled Facilities were able to submit invalid price/quantity pairs.

Table 2 Status Legend

Status
🟢 Internal AEMO changes. No impact to Market Participants.
🟡 Additional functionality. Market Participants awareness only.
🔴 Change to Market Participant functionality. Needs Market Participant attention.
